CAPITAL GROUP

DL INVEST GROUP

MANY YEARS OF EXPERIENCE, COMPETENCES,
EXCEPTIONAL QUALITY

DL Invest Group is one of the most dynamically growing developers and investors in Poland, operating for over 17 years on the commercial real estate market.

The Group's business model assumes full implementation of the investment process based on the internal structure of the group, and then active project management as a long-term owner, offering customers high quality, not only at the time of commissioning the project, but also throughout the entire lifetime of the facility, ensuring the possibility of expansion the flexible response for the needs of tenants. This is a unique advantage over the other developers' competitive business model, based on the "build and sell" principle, where the tenant is part of the sold investment product.

The confirmation of many years of experience and competences is the diversified portfolio of real estate, generating stable long-term flows, the value of which exceeds nine hundred twenty million euros, and the rental of space is maintained at a very high level, thanks to which, among others, every four years, we successfully carry out important asset sales from the point of view of development, confirming quality and market liquidity.

The strength of DL Invest Group is the specialization in selected commercial real estate segments built over the years: logistics parks, retail parks, mixed-use complexes.

over **920 000 000 €**

Group's assets as of Q3 2023 (3.39 mld PLN)

over **1 800 000 000 €**

Group's assets for 2024-2027 based on its land bank

over **97%**

maintained rental level of the real estate portfolio
as a confirmation of DL Invest Group quality

over **240**

specialists in internal structure of the Group as a guarantee
for a flexible approach to tenant's expectations

EXCELLENT LOCATIONS

creating a unique space for business development

SELECTED PROPERTIES

forming a diversified commercial real estate portfolio.

LOGISTIC PARKS

large warehouse parks with a leasable area of 100,000-300,000 sqm with logistics and production functions, as well as tailor-made projects (BTS), created on the basis of individual tenants' needs, including urban developments in SBU format.

MIXED-USE COMPLEXES

the complexes are mixed-use developments combining office, service and retail functions. Their aim is to satisfy all daily needs of the users - the employees of the complex.

SHOPPING PARKS

facilities with a leasable area of 3,000 - 15,000 sqm that are an alternative to large-scale shopping malls and e-commerce developments aimed at satisfying everyday consumer needs based on strong discount brands.

HOUSING PROJECTS

is a residential offer of the highest standard. DL Invest Group attaches great importance to the comfort and quality of life, taking care of access to green areas and ensuring realization of basic needs of residents.

DATA CENTER

Undoubtedly, the most important advantage of using this solution is saving money. You will free yourself from the ever-increasing costs associated with maintaining your own server room.

SELF STORAGE

Storage space for various items such as furniture, documents, tools, seasonal items or other equipment.

DL GREEN ENERGY

With a huge potential of logistics, office and other real estate assets at DL Invest Group, we plan to use them to produce green energy.

LEASE BACK

DL Invest Group's leaseback offer is aimed at commercial property owners,

DL INVEST GROUP

BUSINESS MODEL

BASED ON THE UNIQUE VALUES OF THE GROUP

OVER **17** YEARS OF EXPERIENCE IN THE COMMERCIAL REAL ESTATE MARKET

The strength of DL Invest Group, and at the same time its value and guarantee for the tenant, is a unique business model, successfully implemented for 17 years, which combines the common interest of the tenant and DL Invest Group, who as a landlord, developer and ultimate long-term owner of the property, based on internal structures, actively manages the project to generate additional value for the tenant, thereby acting in its own interest by meeting all the needs of the tenant, striving to maximize the long-term use of the building in the highest standard.

Competitive business models are based on the "build and sell" principle, which reduces the tenant to an element of an investment product which is sold together with the project, often while it is still under construction, which does not provide any value or guarantee for the tenant in terms of the use of the facility. Such a business model, not only cannot guarantee quality and actions in the interest of the tenant, but what is more, it makes it in the interest of the developer that after the sale the tenant is dissatisfied with the project, does not renew the lease, and thus relocates to a new building with a new demand, incurring additional costs and the risk of losing employees due to relocation.

It is DL Invest Group's business model that guarantees quality based on a long-term relationship with the tenant. Several decades of amortization of the project requires us to constantly increase the value of the project and maintain a long-term relationship, meeting the expectations of the tenant in terms of changing requirements (such as arrangement or expansion or reduction of space). **Only this business model is a guarantee for you of the quality of use of the space throughout the lease period.**

FULL RESPONSIBILITY

what we as the landlord bear for the impact of the project, including, for example, social conflicts or traffic problems pulling this type of problem from the tenant

FLEXIBLE APPROACH TO TENANTS' EXPECTATION

thanks to it we strive to extend and renew the lease, which is the primary goal, and thus a guarantee for the tenant as to the quality of service. This has been confirmed by the completion of buildings with a total value of over 3,9 billion PLN and a 97% occupancy rate.

TOP QUALITY FACILITIES

it is in our interest that the facility was realized in the highest quality as it will be used by us as the owners, under the lease for a period of over 20 years. In order to eliminate additional costs during the use of the facility and problems that may arise on the side of the Tenant (defects, interruptions in business), we pay special attention to the quality of implementation and management of the facility.

Emira & MACQUARIE

CONFIRMATION OF QUALITY AND FINANCIAL STABILITY

EMIRA
PROPERTY FUND

Emira Property Fund is a diversified REIT investment fund based in the Republic of South Africa, known for its efficient and innovative real estate investments. As part of its geographic diversification strategy, the fund has decided to collaborate with DL Invest Group, with a target investment of €100 million to support the development of our projects in Poland.

Potential for Further Cooperation. The investment agreement includes an option to increase engagement, highlighting Emira Property Fund's confidence in the stability, efficiency, and growth potential of the projects undertaken by DL Invest Group.

Strategic Partnership. The collaboration with Emira Property Fund is a testament to the global recognition of DL Invest Group's quality and innovative approach in the real estate sector. This investment not only supports the growth of our business but also strengthens our position as a trusted partner in the international commercial real estate market.

MACQUARIE

In 2024, DL Invest Group established a partnership with one of the world's largest investment funds – Invesco, underscoring our ability to execute projects of international significance.

Financing the Largest Project in the Group's History. Invesco has invested several dozen million euros, supporting the growth of DL Invest Group.

Strategic Importance of the Partnership with Invesco. The collaboration with Invesco is not only a financial boost but also a testament to DL Invest Group's reputation as a trusted leader in the real estate sector.

This marks a key milestone in the further development of our group and the strengthening of its position in international markets.

EBRD & INVESCO

CONFIRMATION OF QUALITY AND FINANCIAL STABILITY

DL Invest Group is proud to implement its sustainability strategy with the support of the European Bank for Reconstruction and Development (EBRD), which finances our projects based on green and innovative solutions.

First Financing. As a part of the first transaction, the EBRD has provided more than €100 millions. The projects include modern logistics, office and retail facilities that meet the highest standards of sustainable construction.

Green Real Estate - Our Priorities. Energy Efficiency: Projects developed with EBRD support are equipped with energy-saving systems and modern green installations. Sustainability: All investments meet the requirements of environmental certifications such as BREEAM and LEED.

Modern Technologies: We implement innovative technologies that support the reduction of CO₂ emissions and minimise the carbon footprint.

Long-term Benefits for Tenants and the Region. Due to EBRD support DL Invest Group creates spaces that not only support tenants' business growth, but also help contribute to the sustainable development of local communities.

Emira Property Fund is a diversified REIT based in South Africa, known for its efficient and innovative investments in the real estate sector. As part of its geographic diversification strategy, the fund has chosen to collaborate with DL Invest Group, investing a target amount of €100 million in the development of our projects in Poland.

In 2024 **DL Invest Group** began a partnership with one of the largest investment funds in the world - Invesco. This underlines our ability to implement projects of international importance.

Financing of the the largest project in the Group's History.

Invesco has invested tens of millions EUR, supporting the development of DL Invest Group.

Strategic Importance of the Partnership with Invesco. The partnership with Invesco is not only a financial support, but also a confirmation of DL Invest Group's reputation as a trusted leader in the real estate sector. This is a key step in the further development of our group and the consolidation of its position on international markets.

DL INVEST GROUP

COMPETITIVE ADVANTAGES

DEVELOPED THROUGH YEARS OF EXPERIENCE IN THE INDUSTRY

COMPETENCE IN THE AREA OF GENERAL CONTRACTING

DL Invest Group within the competence of the general contractor, not only controls the construction process, in terms of schedule and costs of implementation, but in particular, combining the functions of property owner and general contractor. In a flexible and fast way to respond to any expectations and changes required by the tenant, during construction and use of the facility. This competence is confirmed by successfully completed projects ranging from revitalization of historic buildings (DL Vintage Post), through implementation of A+ class office buildings (DL Piano Katowice) to specialized production facilities (Hutchinson - Dębica). These unique competencies, combined with competence in the field of commercialization of projects, provide a long-term guarantee for the quality and safety of real estate implemented and maintained in the DL Invest Group portfolio. The above is confirmed by the selection of DL Invest Group by the world's largest logistics company DHL as Managing Partner of JV DHL & DL. Invest Group.

SUCCESSFUL RESTRUCTURINGS

Restructurings of so-called difficult projects, carried out on the basis of internal structures, which were acquired at a substantial discount to market value and thus required modernization, re-commercialization or a change in functionality. Combined with project redevelopment, they not only confirm our competence in acquiring projects for restructuring purposes, thanks to which we can generate high rates of return, but in particular they provide a guarantee for the quality and safety of our commercial real estate portfolio, which is maintained and actively managed.

EXTENSIVE GROUP STRUCTURE

Over the years DL Invest Group has developed the ability to efficiently carry out real estate projects from the stage of acquisition of land at a favorable price, through the design and construction processes until obtaining permission to use the facility - based on experienced experts forming a permanent DL Invest Group team of more than 240 people.

ASSETS LIQUIDITY

The Group owns high quality assets with high liquidity. In order to confirm the market value and significance of its real property assets, the Group regularly, every four years, irrespective of the economic situation, successively sells stabilized assets what is significant from the perspective of the Group's further development, e.g. the transaction of sale of assets to DHL combined with JV with DHL. The value and cyclicity of the transactions confirm the high attractiveness of the properties.

DIVERSIFICATION OF REVENUE SOURCES AND ASSET VALUES

The group is present in three commercial real estate sectors: retail, office and warehouse, which is the fastest growing commercial real estate market in Europe.

EXPANDED LAND BANK BASED ON THE WAREHOUSE SEGMENT

The development potential exceeds 485,000 GLA of which over 410,000 GLA is within the fastest growing warehouse segment in Europe. Thanks to the land bank in its possession, partial participation in own contributions to bank financing is guaranteed, and thus implementation of the adopted strategy without the need to engage significant own funds and acquire additional new land.

DL INVEST GROUP ASSETS

INTERNAL STRUCTURE

STRONGLY DEVELOPED INTERNAL ORGANIZATION

AS A BASIS FOR EFFICIENCY AND STABLE DEVELOPMENT

The strength of DL Invest Group and at the same time a guarantee of quality for customers is an extensive internal organizational structure, which gives the possibility to independently carry out the entire investment process, from analysis and research of the project through financing, design, construction, rental and effective management. The organizational structure consists of a permanent team of over 240 people - highly qualified specialists with many years of professional experience. This structure consists of:

COMMERCIALIZATION DEPARTMENT responsible for customer service and leasing of commercial space. The effectiveness of the Commercialization Department and the quality of projects is confirmed by the level of leased space exceeding 97% (of which 90% of space leased within the framework of own activities - directly without intermediaries), which has been maintained for over 10 years.

INTERNAL GENERAL CONTRACTOR - formed by a team of experienced specialists and project managers who have completed projects for more than 3,7 billion zlotys and are currently implementing investments of 172 000 GLA.
- Facility Management Department - a team of facility managers responsible for managing DL Invest Group's portfolio worth over 3 700 000 000 PLN.

INTERNAL DESIGN OFFICE - based on unique experience and competences in designing buildings and spaces of exceptional functionality and quality. Thanks to the in-house design office, it is possible to redesign any space at any time in a flexible and quick manner, which in cooperation with the in-house general contractor provides unique opportunities for tenant development.

DL INVEST GROUP ASSETS

GENERAL CONTRACTOR

EXCEPTIONAL COMPETENCE AS A GUARANTEE FOR QUALITY
AND A FLEXIBLE APPROACH

It is a set of unique competencies that gives the group a market advantage in all aspects of real estate development.

COST OPTIMIZATION

The construction costs of a project are optimised through the selection of the right materials and the control of their delivery dates by the combined cooperation of the Construction Department, DL Architecture and Production Preparation departments.

TIMELINESS

Direct influence on the construction schedule, where DL Invest Group is the guarantor of meeting deadlines.

FLEXIBLE APPROACH

Thanks to DL Invest Group architects, flexible solutions for space arrangement and expansion guarantees are provided, which directly translates into business development for individual tenants.

PROCESS SUPERVISION

Thanks to the processes comprising the General Contractor, DL Invest Group initiates and manages the various stages of the construction process, thereby ensuring the highest quality of the delivered projects.

MODERNIZATION AND REVITALIZATION

Competence allows the process of modernization and maintenance of existing buildings through changes in arrangement, construction concepts and usability, within the internal structures of the Group, which increases the value of its assets.

DL INVEST GROUP ASSETS

DL ARCHITECTURE – DESIGN DEPARTMENT

GUARANTEE OF SURFACE QUALITY WITH HIGH FUNCTIONALITY
CONFIRMED BY USERS

The basis of DL Architecture's activities is to create and care about the functionality and usability of real estate for its users. For DL Invest Group this is a value of greater importance than artistic architectural creations.

SUPPORT

The team of in-house designers is responsible for supporting tenants from the moment the concept of the space arrangement is established, through its updating, to achieving the final effect satisfactory to the tenant. During the use of the space, during the term of the lease. The designers are also available to the Tenants in case of needs connected with modification of the existing arrangement.

SUPERVISION AND COORDINATION

The Architecture Department coordinates the work of the General Constructor Department in terms of cooperation with the Tenants and plays a key role in adjusting the space to the Tenants' requirements.

QUALITY AND FUNCTIONALITY

DL Architecture's work is focused on the most effective use of real estate conditions in terms of functionality of the emerging space in relation to the highest quality of materials used.

PROPERTY MANAGEMENT DEPARTMENT

FULL RANGE OF FACILITY MANAGEMENT SERVICES AND OPTIMIZATION OF REAL ESTATE COSTS

EXTENSIVE TEAM OF SPECIALISTS AND THE HIGHEST QUALITY

Current and direct supervision over the technical condition of the facility allows for the elimination of possible defects and guarantees that the facilities are maintained in perfect technical condition. Our services are confirmed by property audits conducted by reliable external experts. To ensure the highest quality of services, we conduct a detailed analysis of every aspect of their operation.

SAVINGS

Cost optimization and directly related savings are our priority. Ongoing financial analysis and full automation of processes allow for precise budget planning. The tools and improvements introduced by us significantly reduce the operating costs of facilities.

GUARANTEE OF SAFETY

The essential element of our activity, on the basis of which we have been building your trust for 17 years, is the supervision and constant implementation of further necessary procedures aimed at ensuring the highest comfort combined with a maximum guarantee of safety.

IMMEDIATE ASSISTANCE

Thanks to specialized staff with many years of experience and through a dedicated team of supervisors, we respond immediately to your needs, both technical and commercial.

GREEN POLICY

DL INVEST GROUP

DL Invest Group investments are designed with Tenants in mind, based on the principles of sustainable construction, while maintaining the highest energy efficiency requirements, thus guaranteeing the lowest costs of space maintenance for tenants, while meeting the stringent requirements of the international BREEAM building certification system.

- **Guaranteed lower rental costs** thanks to lower building operating costs (up to 20% lower than in ordinary buildings). Possible due to application of solutions that effectively use energy, water and waste management.
- **Project certification in the international BREEAM system** and obtaining at least Very Good level. This level of certification requires the assumption that the ecological value of the site before the investment will not decrease after its construction.
- High indoor **air quality** and appropriate lighting, which creates a friendly indoor climate affecting the well-being and effectiveness of people at work. According to the World Green Building Council, better indoor air quality alone increases productivity by over 10%.
- **The use of renewable energy sources**, whose share in the energy balance of the project is the majority. This includes low-emission heat pumps and photovoltaic panels.
- Designing **wide green belts**, including high greenery along the roads and areas included in the projects, which among other things reduces the impact of road transport on the immediate surroundings.
- Use of mostly **recyclable materials** for construction.
- Implementation of an appropriate **system of waste management and utilization** on the investment site, which will exclude the potential impact on the immediate surroundings of the projects.
- maximum **high indicator of biologically active area** of the site.
- Maximum **protection of the existing tree stand** and maximum planting of plants creating friendly environment for numerous animals and creating natural habitats, which as a result contributes to preservation of biodiversity of the area.
- **Small architecture** elements such as benches, outdoor gym for employees and residents.

SAFETY

the high level of care in the construction of the building and responsible management guarantee the safety of the building's users, both in terms of health care during everyday use and in the event of emergencies..

COMFORTABLE AND ATTRACTIVE USE

of rented space in economic terms - DL Invest Group facilities are managed and operated by companies of rented space in economic terms of internal service and facility management departments, bearing full responsibility for the operation of facilities, and at the same time their tenants, so we guarantee the lowest service charge without surcharges from external entities.

HEALTH AND COMFORT AT WORK

for users - good air quality and appropriate amount of daylight, green recreational zones, friendly infrastructure and good communication with the workplace are also important factors in terms of attracting good employees and building employer image

BREEAM STANDARDS

the use of BREEAM certified buildings
BREEAM-certified buildings have a positive impact on the company's image - they demonstrate a high level of employee care and responsibility in terms of environmental protection, as well as a modern approach to management in line with sustainable development principles.

LOGISTIC PARKS

DL Invest Park

The key role in the development of DL Invest Group play warehouse facilities, operating under the brand DL Invest Park. Listening to the needs of tenants and closely following the trends in the market for warehouse space results in the creation of facilities with the highest standard, equipped with full infrastructure and a number of facilities for users of the property.

Warehouse space offered by DL Invest Group have a guaranteed possibility of expansion and flexible arrangement of space during the entire life of the project.

Warehouse facilities combined with high quality offices (the investor uses the experience gained over many years in the office real estate market) in the format of warehouse centers, built-to-suit facilities, urban facilities in the format of a small business unit.

DL Invest Park logistics parks provide comfort for employees not only in terms of work ergonomics, but also through non-standard solutions for guaranteed expansion, dedicated public transport, employee canteens or recreational areas, allowing tenants to build the desired image within a given location, limiting the risk of losing some employees due to the need to relocate.

PROJECT CHARACTERISTICS

DL Invest Park Bielsko-Biała boasts an excellent location within a region with well-developed road infrastructure. The complex is situated in the heart of Bielsko-Biała, providing direct access to key transportation hubs. It is located near roads S1 and E462, with S1 serving as one of the region's main transport routes, connecting Bielsko-Biała through Cieszyn to the Czech border.

The property features its own infrastructure, including five access points to major roads, direct connectivity to the city center, and even a railway station within the complex, offering connections between Katowice and Bielsko-Biała, further enhancing its attractiveness.

Strategic Location for Workforce Accessibility

The DL Invest Park Bielsko-Biała location offers strong potential for workforce availability. The Silesian Voivodeship is home to prestigious universities that educate top specialists and high-level professionals. Additionally, the region provides a high availability of skilled labor, making it an ideal destination for businesses seeking a qualified and diverse workforce.

DL INVEST PARK BIELSKO-BIAŁA III

141 Michała Grażyńskiego Street

DL Invest Park Bielsko-Biała is one of the largest cross-regional production and logistics complexes with office facilities and high development potential. The project is set to be transformed into one of the most modern and largest industrial and technology parks in the region.

The complex covers a total area of approximately 52 hectares, offering over 270,000 sqm of leasable space. This makes it an exceptional growth-oriented project, designed to accommodate both current and future tenants who require not only core operational space but also expansion areas.

DL Invest Park Bielsko-Biała has been adapted to meet the needs of tenants operating in various manufacturing and warehousing sectors, including Magneti Marelli, Electropoli, and Avio.

DL INVEST PARK PSARY

AKACJOWA STREET, PSARY

DL Invest Park Psary is a logistics center in Silesia with an international range located on a 90-hectare plot directly connected, by a collision-free junction, with the national road DK86, from which within 5-20 minutes you can reach the main transport routes in Poland: A4 and A1 freeways and S1 expressway. It is a long-term and developmental investment, which is guaranteed by a building permit for the construction of facilities with a total usable area of 320,000 m².

In order to expand DL Invest Park Psary warehouse park a cooperation between DL Invest Group, the owner of the center, and DHL Supply Chain was established. As part of the cooperation, in the form of JV DHL / DL, an innovative manufacturing and warehousing center will be created offering professional logistics services to improve efficiency and optimize the supply chain in a warehouse, green A-class buildings, meeting all the needs of individual tenants.

DL INVEST PARK TERESIN

ŚW. JANA PAWŁA II STREET, TERESIN

It is a logistics park with a total area of over 30 ha. The property is located in Teresin-Gaj, Masovian Voivodship, Sochaczew County, Teresin Municipality, 40 km west of Warsaw.

The Teresin commune has a very well developed network of local roads (nearly 400 km) of which the most important - the so-called ring road, is an internal road consolidating 500 ha of investment areas in Teresin-Gaj, Grove, Elżbietowo and Szymanów. The E20 railroad line runs 400 m from the logistics park.

A modern biological-mechanical sewage treatment plant in Borders is currently operating there.

The plots have direct access to a communal road, which is directly connected with a national road No 2, and through a national road No 50 (suitable for heavy traffic) has access to the under-construction A2 freeway junction in Wiskitki.

DL INVEST PARK SIEWIERZ

WAREHOUSE
FACILITIES

The area of DL Invest Park Siewierz was prepared for the realization of a logistics and production center, taking into account the convenient road infrastructure communicating the investment with the largest cities of Silesia and Poland. In order to maximize the project's potential, a commercial and service zone was also taken into account. Siewierz is a town in southern Poland, in Silesian Voivodship, in Będzin County.

Its convenient location ensures easy communication with the region. Siewierz is crossed by the southern bypass of the national road No. 78, which connects with the national road No. 91 through a two-level crossing. A few kilometers south of Siewierz, the national road No. 91 connects with the expressway S1, which runs to the junction with the A1 freeway located in Pyrzowice.

BTS

DL Invest Park

BTS warehouse space developed by DL Invest Group is a concept created with an individual customer's needs as its focus.

The aim of cooperation in this type of projects is to realize an investment taking into account a number of specific needs of the tenant so as to maximize the use of storage space, optimize the production process or adjust the space to the technical conditions of the business. As a result, the client has the opportunity to shape the space he or she is leasing already at the design stage.

The tenant can freely compose the modules of office or warehouse space, so that he receives exactly as much space as he needs and arranged in such a way as to be able to use it most efficiently.

DL Invest Group implements BTS projects tailored to the needs of tenants, located throughout Poland. Thanks to its diversified portfolio of investments, the Group has the experience necessary in cooperation with challenging customers.

CHARACTERISTICS OF THE PROJECT

- excellent location in the vicinity of major national roads (DW790, DK94, S1, A4, A1)
- very well developed railroad network not far from the plot
- proximity of international airports
- hall standard: class A, high thermal and acoustic parameters, energy-saving ecological solutions
- full accompanying infrastructure,
- in Dąbrowa Górnicza there is a Sosnowiec-Dąbrowa Górnicza subzone of the Katowice Special Economic Zone
- attractive labour market
- main tenant: GTX Hanex Plastic
- 100 parking spaces

LOCATION

- province of Silesia
- directly on DW790 road
- 3 minutes from DK94 (west-east: Zgorzelec-Korczowa)
- 5 minutes from S1 road
- 5 minutes to A4 freeway
- 20 minutes to Katowice
- 30 minutes to A1 freeway
- 20 minutes to Katowice-Pyrzowice International Airport
- 45 minutes to international Airport Kraków - Balice
- 60 minutes to border crossing in Cieszyn

DL INVEST PARK DĄBROWA GÓRNICZA

KOKSOWNICZA STREET, DĄBROWA GÓRNICZA

WAREHOUSE
FACILITIES

DL Invest Park Dąbrowa Górnicza is a logistics park located in Dąbrowa Górnicza at 10 Koksownicza Street, between the Katowice Steelworks and Przyjaźń Coking Plant, in the immediate vicinity of Łagisza Power Plant. The park is located by voivodeship road 790. Dąbrowa Górnicza is home to the Sosnowiec-Dąbrowa Górnicza subzone of the Katowice Special Economic Zone (KSSE). The city has a very well-developed railroad network with one of the highest densities in the country.

The International Airport in Pyrzowice is located about 11 km from the city border and about 18 km from the center. Dąbrowa Górnicza is the largest city in the voivodeship (10th in Poland) and the biggest industrial center in the Zagłębie Dąbrowskie region. The facility has an area of 10,000 sqm. The halls and office space were built using energy-efficient technologies, which ensures low operating costs and high comfort of use.

DL INVEST PARK CZECHOWICE-DZIEDZICE

ORZESZKOWEJ STREET, CZECHOWICE-DZIEDZICE

WAREHOUSE
FACILITIES

DL Invest Park Czechowice-Dziedzice is another build-to-suite (BTS) project, which will be created with a view to the unique needs of the tenant - a company from the French automotive group Valeo. The new warehouse will allow the tenant to optimise the storage of components for production and finished products. The facility, with a planned target area of more than 22,800 sq m, will respond to the tenant's needs with regard to both production facilities and warehousing. The investment will be constructed on a site located in

Czechowice-Dziedzice. The city is located in the southern part of the Silesian voivodeship and has convenient transport connections with the whole region (in the vicinity of DL Invest Park Czechowice there is a national road DK 1 and a railroad line) and the Czech Republic (40 km from Czechowice there is a border crossing in Cieszyn). Czechowice-Dziedzice is a thriving and rapidly growing industrial center, bringing together companies from various industries, located in the central part of the Bielsko Industrial District.

DL INVEST PARK RZESZÓW

SPICHLERZOWA STREET, RZESZÓW

DL Invest Park Rzeszów is a project of a warehouse investment realized in a "build-to-suit" formula in the area of Rzeszów. The project will involve the implementation of an office and warehouse investment with an area of 26 350 m² on a degraded area of the current car exchange. Based on the internal analysis, tenant demand and Group's experience we have prepared a project dedicated to the specificity of urban warehousing, which will provide benefits

and new quality to the City of Rzeszow. It will activate the designated part of the city, creating over 1000 new jobs.

As a long-time owner of the projects under construction, we take care of the environment through adequate planting, the highest BREEAM standards and DL Green policy ensuring environmental sustainability.

MIXED-USE COMPLEXES

DL Office

The flagship of DL Invest Group are mixed-use investments creating multifunctional office, retail and service complexes. Located in top locations of large cities provide modern workspace in buildings with the highest standard on the market A +. The original architecture, high quality workmanship and implementation of buildings in accordance with the principles of sustainable construction guarantee tenants a high comfort of use and cost-optimal use of office space.

DL Invest Group office complexes are designed on the basis of the latest trends, which treat modern offices not only as places to work, but also as an important factor affecting the success of companies. Providing employees with a well-designed space in which they feel comfortable, positively affects the effectiveness of work and achieve better results.

The idea of ensuring maximum comfort for users of DL Invest Group office complexes is complemented by the location of commercial and service premises in the buildings. Stores, cafes,

restaurants, kindergartens, gyms, laundries, recreation and leisure zones give tenants the opportunity to comfortably organize their work and private life.

The functions offered by DL Invest Group office parks are complementary to each other, and this creates added value for employees.

In response to the changing reality, DL Invest Group offers its tenants flexible office space allowing for any arrangement of offices according to the needs and expectations of customers in both office and open space. It is also available to rent furnished office space on flexible lease terms - even for a period of one month.

The portfolio of DL Invest Group includes newly constructed buildings and unique, historic, revitalized properties that have been adapted to the high standards of modern office real estate.

CHARACTERISTICS OF THE PROJECT

- **Location** – The facility is located in the center of Katowice, right next to Silesia City Center, with easy access to major road arteries (DTŚ, A4, A1).
- **Transportation** – Numerous bus and tram stops nearby ensure quick connections to the city center, the PKP railway station, and other city districts. Public transport runs frequently, including during peak hours.
- **Cycling Infrastructure** – The facility is connected to the city's cycling network, allowing for a safe commute by bike. There are bike stations nearby, including city and sponsored bike-sharing options. The complex offers 60 bike parking spaces, equipped with locked cabinets and showers.
- **Parking** – Underground parking with the ability to adjust the number of spaces to meet tenant needs.
- **Business Environment** – Access to a skilled workforce from Katowice and surrounding cities.
- **Functionality** – DL Craft Katowice Chorzowska offers modern office and service spaces with the possibility to customize the area to meet tenant needs. The facility provides comfortable working conditions and attractive infrastructure in a dynamically developing part of the city.

DL CRAFT

Chorzowska 105, 40-101 Katowice

OFFICE
FACILITIES

DL Craft Katowice Chorzowska is a modern complex located in the heart of Katowice, right next to Silesia City Center. With proximity to key transport arteries such as DTŚ, DK86, and highways A4 and A1, it offers excellent connections to the entire Silesian region. It stands out for its access to a skilled workforce, proximity to PKP and PKS transport hubs, and an extensive cycling infrastructure. This is an attractive location for businesses, offering broad logistical and communication opportunities.

CHARACTERISTICS OF THE PROJECT

- functional A-class office and service facility located in a revitalized modernist tenement house with a rich history
- excellent and prestigious location in the very center of Katowice and attractive labour market
- in the zone of influence - with residents of neighbouring cities working in Katowice - there are about 500,000 people
- high recognition of the building and location
- extensive public transport network in the vicinity of the building (buses and streetcars) in the immediate vicinity there are metropolitan public transport stops allowing for efficient access to the neighbouring towns (including Gliwice, Ruda Śląska, Mikołów, Tychy, Zabrze, Bytom, Dąbrowa Górnicza, Mysłowice, Siemianowice Śląskie)

LOCATION:

- 3 minutes (on foot) to the Market Square, the Katowice City Hall, the Silesian Theatre
- 7 minutes (on foot) to the main railway and bus stations and the main post office
- 3 minutes to the International Congress Centre and Culture Zone, which includes the "Spodek" Sports and Entertainment Hall, the NOSPR concert hall and the Silesian Museum
- 5 minutes to the largest shopping malls in Katowice: Silesia City Center and Galeria Katowicka
- 4 minutes to DK86 (Tychy-Warsaw)
- 6 minutes to A4 freeway (Wrocław - Rzeszów)
- 1 km to Silesian University

DL CENTRAL

MIEŁĘCKIEGO 10 STREET, KATOWICE

OFFICE
FACILITIES

DL CENTRAL is located in the very center of Katowice, in the Śródmieście district, at 10 Mielęckiego Street, close to the railway and bus stations, as well as the city's and region's key administrative institutions.

DL CENTRAL was built between 1938 and 1939 on commission by the former International Commercial Bank. It was designed in

1936 by Karol Schayer, one of the most prominent representatives of modernism in Polish interwar architecture.

After the renovation carried out by DL Invest Group in 2013, the building not only lost nothing of its original features, but gained a quality that will meet the space needs of demanding tenants who want to be in the center of events.

DL VINTAGE POST

DOLNYCH WAŁÓW 8 STREET, GLIWICE

OFFICE
FACILITIES

DL Vintage Post, once the building of the Main Post Office in Gliwice, located at ul. Dolnych Wałów 8, was erected in the years 1903-1906 and is a unique example of Upper Silesian architecture in the historicism style with a visible dominance of neo-Gothic features.

This unique building is located in Gliwice's Old Town, at the intersection of Dolnych Wałów and Zwycięstwa streets, which are

the main arteries communicating the city center. In the vicinity of the building, there are numerous retail and service outlets, the seat of the local authorities, cultural institutions, faculties of the Silesian University of Technology and housing estates. Thanks to the revitalisation carried out in accordance with preservationist guidelines, the building impresses with its unique historical and architectural values.

CHARACTERISTICS OF THE PROJECT

- the excellent location of the facility provides efficient communication with very important roads in Poland, i.e. S2-A2, S2-S8, these roads connect the east and west of the country and the north with the south
- housing estates - the base for the availability of a workforce permanently tied to the district itself and thus to the employer, guaranteeing stability of employment and fulfilment of the goals of various types of organisations and commercial entities operating in this part of the cities
- ecological solutions were applied, such as: energy-efficient lighting, a system for current reading of passive energy consumption, door and window woodwork with increased energy-saving parameters
- possibility of expansion, individual space arrangement of the lease area
- extensive public transport network in the vicinity of the building
- secure parking in the inner courtyard and parking spaces for bicycles
- attractive job market in a thriving investment center

LOCATION:

- metro station nearby
- 25 minutes by public transport to Central Railway Station (tram lines 17, 18, 31, 41, bus lines 189, 317, 401, 402)
- 5 minutes by car and 26 minutes by public transport to the Chopin International Airport in Warsaw

DL IRIS

CYBERNETYKI 9 STREET, WARSAW

OFFICE
FACILITIES

The DL IRIS building is located in a highly urbanised business district with many office buildings - Mokotów, which is home to international corporations.

Within a 2-minute radius there is the Galeria Mokotów shopping mall. In addition, the property's catchment area includes a fast connection to the centre of Warsaw via the metro line, which runs close to the building.

The residential building market has been developing around the complex for years. The modern apartment buildings in the vicinity make it possible not only to bring in specialists to provide their services to the building's tenants, but also to create a place that is friendly to the surrounding residents in the form of dining, shopping and service outlets.

DL Green
designed with the
environment in mind

CHARACTERISTICS OF THE PROJECT

Designed to a design by Hermann Grupow, Wrocław's first station of the Right Bank of the Oder Railway opened on 28 May 1868 and functioned as a temporary station. The new station was to serve trains travelling on the new route towards Oleśnica, Kluczbork and Lubliniec. Over the years, the building was rebuilt and extended to undergo its first comprehensive modernisation in 1911 and 1912. Among other things, new platforms and tunnels were built then. The 190m-long station building, built of 190m-long unplastered red cengillas, with a mass and projection reminiscent of the schemes of Renaissance palaces, housed a number of railway offices, a dispensary, a conductor team nest, a railway common room and ticket offices. The three-storey body of the station has three risalts, of which the central, four-storey one is preceded by an arcaded portico.

After the war - on 21 July 1945, after the bridge over the River Widawa had been rebuilt, it became the first station in the centre of Wrocław; previously, trains had stopped at Psie Pole.

The station once handled freight traffic associated with the surrounding industrial plants. Today, most of the factories no longer operate and the remaining sidings are still used by the Combined Heat and Power Plant and companies located in the City Port. The tracks near the closed businesses have largely been demolished. The once railway-industrial area is being turned into residential and service areas.

The redesign of the station building envisages 5,400 m² of office space.

The newly designed building in the eastern part of the site provides approximately 3,200 m² of leasable premises.

SITE PLAN

DL NADODRZE

STANISLAW STASZIC SQUARE, WROCŁAW

OFFICE
FACILITIES

DL INVEST Group is a company that is not indifferent to social and historical aspects when making major investments in this type of building. We always take the utmost care to investigate and restore the public awareness of the entire historical dimension of the object.

As is well known, thousands of Jews, Poles and Roma were transported from the NADODRZE railway station in Wrocław to

concentration camps during the Third Reich. The largest deportations took place from this station. This is why we are making an effort and taking on the great challenge of preparing a serious project to commemorate the thousands of people deported from Wrocław and Lower Silesia via the NADODRZE railway station to concentration camps.

SHOPPING PARKS

DL Shopping Park

DL Shopping Park is a friendly, family-oriented retail and service center, which allows the realization of basic and everyday shopping needs of consumers. On the area from 3,000 to 15,000 GLA there are well-known and popular brands of retail chains from the food, textile, cosmetics, leisure or electronics industry with a strong service offer in the form of kindergartens, clinics or gyms.

The objects are managed by DL Invest Group as shopping, service and entertainment centers with a supra-regional impact. Carefully selected tenants create a complementary, coherent offer for different groups of customers.

DL Shopping Park is a brand under which today operates more than a dozen retail and service objects, they are convenience centers.

CHARACTERISTICS OF THE PROJECT

- the Manhattan mall is located in the south of Katowice, in the densely populated Piotrowice-Ochojec district
- in the vicinity of the retail park are located large multi- and single-family housing estates with a potential population of over 30 thousand inhabitants
- due to the surroundings, which are medical and educational centers of supra-regional importance, the group of customers are also the inhabitants of neighbouring towns
- the facility is very well connected to the southern districts and neighboring cities (Mikołów, Tychy) through direct access to Gen. Jankego Street, which is one of the main streets in this part of the city. It takes up to 5 minutes to reach DK 81 leading to the center of Katowice.
- number of floors: 2
- land area: 10.000 m²
- 1 minute drive to DK 81 (Wisła-Katowice)
- 5 minutes drive to DK 86
- 5 minutes to A4 road
- 10 minutes to S1 road
- 5 minutes to PKP Piotrowice railway station, 7 minutes to PKP Ligota railway station and 15 minutes to the central railway station
- 15 minutes to Katowice city center
- 15 minutes to Tychy and Mikołów

DL SHOPPING MANHATTAN

SZEWSKA STREET, KATOWICE

SHOPPING
PARKS

DL Shopping Park Manhattan is located in the southern district of Ochojec-Piotrowice. The district has over 25,000 inhabitants. Piotrowice-Ochojec is a district with multi-family housing, as well as a place of business of many companies (among others Famur SA). Piotrowice-Ochojec is the district most often chosen by families with children, who appreciate the low industrial concentration, the proximity

of forests and plenty of greenery inside the district, the low intensity of development, the transit traffic on the outskirts, and a very good connection with the city center. For several years now, the southern districts of Katowice have been developing very dynamically and becoming a place for investments by developers.

Ruda Śląska is a city with county rights located in Śląskie Province. It has over 137 thousand inhabitants. The city is characterized by distinct districts and a polycentric structure, formed over several hundred years. Excellent infrastructure connects the districts into one urban organism. The A4 freeway runs through the southern districts of the city. The main traffic artery of the city is 1 Maja Street, which is a section of the Bytom-Rybnik road.

The Drogowa Trasa Średnicowa (Intercity Road) provides quick access to the cities located in the eastern part of the Silesian Voivodeship.

Ruda Śląska is a city where apart from modern housing estates there are colonies of familoks. It is a city with interesting architecture, history, identity and Silesian tradition. Despite its industrial character, Ruda Śląska is one of the greenest cities in Upper Silesia, with many parks, squares, forests and recreational places.

DL SHOPPING RYBNIK

RACIBORSKA STREET, RYBNIK

SHOPPING
PARKS

DL Shopping Park Rybnik is a commercial and service object, in an excellent location, of supra-regional importance. Rybnik is a city with district rights, located in southern Poland, in the Silesian Voivodeship. It is the largest central center of the Rybnik Agglomeration and the Rybnik Coal District. Rybnik is one of the largest and most populous cities in the Silesian Voivodeship. Rybnik, due to its location as well as its role in the entire region (capital of the Western Sub-region of the Silesian Voivodeship, inhabited by about 600 thousand people), has f

favourable conditions for entrepreneurship development. This is evidenced by the presence of recognizable companies of national and international range, such as Doosan Babcock Energy Polska S.A., Purmo Group Poland sp. z o.o. or TENNECO Automotive Polska sp. z o.o. An important element of the economic functioning of the city is Rybnik Power Plant, which is a part of Polska Grupa Energetyczna.

HOUSING PROJECTS

DL Residence

CHARACTERISTICS OF THE PROJECT

DL Residence will feature:

- A business center with office and co-working spaces
- An Accor-branded hotel with conference rooms and a rooftop Sky Bar
- Shared spaces, a food hall
- A nursery, grocery store, gym, and service outlets, including a beauty salon and restaurant
- A monitoring system
- A Wellbeing Center with a clinic and hotel

Key locations:

- Bus stop (100 m)
- Primary school, kindergarten, and playground (950 m)
- Gliwice Market Square with shops and restaurants (1.2 km)
- Chrobry Park (1 km)
- Train/Bus station (500 m)
- Silesian University of Technology (700 m)

DL PRIME GLIWICE

MŁYŃSKA STREET, SIEWIERZ

RESIDENTIAL
BUILDINGS

The investment carried out by DL Invest Group will completely transform the city center, offering modern architecture in line with the modernist character of Gliwice.

Prime is one of the largest investments in southern Poland. Covering an area of nearly 3 hectares, it will feature approximately 78,000 sqm of usable space, including three residential buildings (with 12, 17, and 20 floors) with retail spaces on the ground floor, as well as offices and a hotel under the Accor brand.

The project will be crowned by a residential tower reaching a record height of 80 meters.

The development aligns with the concept of sustainable growth by reducing pollution and creating self-sufficient "5-minute neighborhoods." It takes into account the needs of the local community by offering more public spaces and green areas while incorporating innovative eco-friendly solutions.

DL LIVING PARK SIEWIERZ

MŁYŃSKA STREET, SIEWIERZ

RESIDENTIAL
BUILDINGS

DL Living Park Siewierz is a unique proposal for a sustainable housing estate, located just 1.9 km from the market square in Siewierz and only 32 minutes by car from the center of Katowice.

The priority of the investment is to provide residents with high quality of life in safe, ecological buildings equipped with renewable energy sources. They will meet modern housing standards. An unquestionable advantage will be the functionality of the surroundings, the possibility to realize not

only basic, but also higher life needs of the residents. The northern areas of the area will be designated for the development of services complemented by the residential function. There will also be sports and recreational areas.

The choice of location is supported by the proximity of nature and good transport accessibility. A unique advantage is also the location of the area near the Przeczyce-Siewierski lagoon and the Mitrega river.

DATA CENTER

DL Invest Group

What are the advantages of using Data Centre services?

Undoubtedly, the most important advantage of using this solution is saving money. You will free yourself from the ever-increasing costs associated with maintaining your own server room. On top of this, you can delegate your IT staff to other tasks that are more important for the development of your company. All this for a low and, above all, fixed monthly fee.

However, our specialists emphasise that using, for example, a server rental or colocation service in a Data Centre, brings many more benefits. Other significant advantages of this solution include:

- a high level of IT security - companies maintaining such centres invest in state-of-the-art software to protect data from leakage or loss, and use multi-stage systems to control who has access to the buildings,
- - guarantee of continuity of operation - the Data Centre is completely insensitive to, inter alia, exceptionally harsh weather conditions or power grid failures; the premises are air-conditioned, ventilated and properly monitored, and the buildings are connected to multiple independent power sources,
- use of remote access to resources via console servers, KVM switches and centralisation software,
- reducing the risk of server failure to a minimum - such large centres use so-called redundant systems; if one server device stops working, its tasks are immediately taken over by another,
- - access to resources from anywhere in the world - this will be appreciated, for example, by large companies with branches in different cities and companies with many field employees,
- monitoring of all devices using management software, Data Centre Infrastructure Management (DCIM)
- the possibility of rapidly increasing hardware resources or server space,
- 24-hour support from IT specialists..

For DL Invest Group, you are a valued partner. We are committed to the development of your business and are ready to assist you in this process.

We encourage you to engage in a technical dialogue with our specialists to better understand the needs of your organization, so that we can recommend optimal solutions.

DATA CENTER

DATA
CENTER

Based on the company's internal structure and competences, we plan to introduce new business lines in the form of Data Centres as one of the fastest growing segments. Both types of facilities can be valuable investments, given the growing demand for storage of physical and digital assets.

Data centres will be developed in response to tenant demand and expectations. They can support servers, cooling systems, backup power and other important elements of the IT infrastructure. The data centres will meet high security standards, both in terms of physical access and cyber security.

object
**BUILDINGS
SPECIALISED**

purpose:
**CENTRES
DATA CENTRES**

Physical security

Our facilities meet the highest security standards.

Implemented security policies, carefully selected security personnel, along with an access control system, intrusion and hold-up alarm system,

video surveillance system, and physical barriers create a comprehensive security system, ensuring that no unauthorized person will have access to the data center infrastructure.

Telecommunication security

Our Data Center provides the possibility of ensuring redundant network services. Independent cable routes and separated telecom zones (MMR) guarantee the highest service availability standards.

Our data centers are telecommunications-neutral, following a carrier-neutral approach.

By leveraging the extensive capabilities of our data centers, you don't have to compromise on your telecommunications standards.

Fire safety

Our Data Center consists of multiple independent fire zones to ensure the highest level of safety.

Early smoke detection systems (VESDA) and sensor systems enable continuous monitoring.

The use of inert gases (IG) guarantees safety while demonstrating our commitment to protecting the ozone layer.

The use of silencers in fire suppression systems ensures the safety of IT equipment in rack cabinets.

Energy-efficient solutions

All components of our data center are selected to ensure reliability while respecting the natural environment.

Our data centers are 100% powered by green energy. Photovoltaic installations optimize the

operation of air conditioning systems in an innovative way.

The solutions we use enable heat recovery, allowing for even better energy utilization.

SELF STORAGE

DL Invest Group

The main features of self-storage are:

- **Individual units:** Customers can rent individual storage units, which means they have control over their stored items.
- **Security:** Self-storage provides security such as camera monitoring, security, code or key card access to secure stored items.
- **Accessibility:** Customers have access to their units at specific times, allowing them to freely add or remove items.
- **Time flexibility:** The self-storage service is flexible in terms of rental time. Customers can rent the space for a short period of time, for example during a move, or for a longer period when they need long-term storage.
- **Different purposes:** Use self-storage for a variety of reasons, such as storing furniture during renovations, storing collections, archiving documents or storing seasonal items.
- **Security:** Self-storage companies typically provide security measures such as camera monitoring, facility security, access systems, making stored items safe.
- **Easy access:** Customers have access to their units at specific times, allowing them to freely add, remove or view their stored items.
- **Variety of unit sizes:** Self-storage companies typically have a variety of unit sizes, allowing customers to tailor the space to the number of items stored.
- **No long-term commitments:** Customers are not committed to long-term contracts, giving them flexibility in their use of the self-storage service. They can tailor the rental to their current needs.
- **Different purposes of use:** Self-storage services are used for a variety of reasons, from storing items during a move to storing company stock or collections.
- These advantages make self-storage services attractive to many people who need temporary or long-term storage space for their belongings.

ADVANTAGES OF SELF-STORAGE SOLUTIONS:

- Space to store a variety of items such as furniture, documents, tools, seasonal items or other equipment.
- Time flexibility: self-storage services are flexible in terms of rental duration. Customers can use the space for short or long periods, adapting the rental to their needs.

SELF STORAGE

SELF
STORAGE

Based on the company's internal structure and competences, we plan to introduce new business lines in the form of Self-storage as one of the of the fastest growing segments. Both types of facilities can be valuable investments, given the growing demand for storage of physical and digital assets.

Self-storage is where individuals and businesses can rent space to store their belongings. We would like to introduce this service in our SBU and City Logistic facilities as a complementary service and implement it in some Mixed-Use facilities, thus responding to market needs. We will ensure that such facilities will be monitored and secured, giving customers confidence that their belongings are safe.

object

SELF-STORAGE

A decorative background consisting of several overlapping hexagons. The central hexagon is a light beige color, while the others are thin, light brown outlines. They are arranged in a staggered pattern, creating a geometric, honeycomb-like structure.

DL Green Energy

DL Invest Group

Investment in renewable energy components (PV and energy storage) within DL Invest Group's existing portfolio of assets and development of new PV farms and energy storage as part of DL Green's strategy to decarbonize facilities.

With an eye on the future, the ever-changing market environment, and the environment for which we share responsibility, we have decided to create a DL Energy strategy under the "DL Green" concept. Meeting the highest requirements for low-carbon and energy efficiency is one of the elements of our policy, which guarantees our tenants the lowest cost of space, while meeting the most stringent requirements of the international BREEAM building certification system, with a positive impact on the environment. Work is currently underway to obtain installation connection conditions for the various locations of DL Invest Group's properties. The next step will be the selection of a contractor responsible for the comprehensive implementation of the investment in generating units and energy storage.

DL Energy began operations in 2023.

STATUTORY ACTIVITIES FOR ENERGY

Generation of energy from renewable energy sources (photovoltaic panels) on rooftops and land within DL Invest Group's real estate portfolio.

PROJECT AIM

The aim of the project is to decarbonise DL Invest Group's properties in order to have a positive impact on the environment and to create an additional source of income, generated by the sale of green energy.

LAUNCHING THE PROJECT

At the end of 2021, DL Invest Group Energy Sp. z o.o. was established, part of the holding structures of DL Invest Group S.A., which is responsible for implementing the DL Green concept. The launch of the first installations is planned for 2025.

DL Green Energy

DL Green Energy

The purpose of the planned investment is: to meet the global trends and needs of decarbonization of the economy and business.

Having at DL Invest Group a huge potential of logistics, office and other real estate assets, we plan to use them to produce green energy.

As a first step, we would like to install photovoltaic installations on the surfaces of our roofs.

The energy produced from them will not only allow us to supply our tenants with cheap and green energy, but thanks to our own trading company (an entity with the appropriate licenses for electricity trading), we will be able to trade surplus energy on the wholesale market and ultimately sell electricity to end users. We would like to be one of the first, to combine the production of energy from photovoltaic farms with the possibility of storing it in energy warehouses.

ENERGY

Photovoltaic Market in Poland

By the end of 2023, Poland's installed photovoltaic (PV) capacity reached 17.08 GW, increasing to 17.73 GW by the end of Q1 2024. While the absolute capacity growth remained similar to 2022 at approximately 4.6 GW, the market structure underwent significant changes. The proportions of installed micro-installations (up to 50 kW), small installations (above 50 kW), and large-scale "farm" installations exceeding 1 MW have shifted.

Compared to 2022, there has been a noticeable slowdown in the prosumer micro-installation segment. An analysis of Q1 2024 suggests that this trend is likely to continue, leading to further deceleration or stabilization of micro-installation growth throughout 2024. Several factors contribute to this trend: the ongoing freeze on electricity prices for individual consumers, persistently high inflation, rising bank loan costs, and the resulting economic strain on the middle class. These conditions have led small investors to delay or postpone investment decisions in solar energy.

However, this slowdown in the micro-installation sector has been offset by increased capacity additions in small-scale installations and large PV farms over 1 MW, which grew by 24.3% and 9.4%, respectively.

Energy Storage Market – BESS

According to the International Energy Agency (IEA), in 2023, over 40 GW of battery storage capacity was added to the global energy sector (excluding e-mobility), marking a doubling of growth compared to 2022.

Battery Energy Storage Systems (BESS) have multiple applications in power systems: they enable short-term energy shifting, provide regulatory and ancillary services, alleviate grid congestion, and enhance access to electricity.

So far, the majority of BESS deployments worldwide have been in large-scale projects within public grids operated by transmission and distribution system operators (TSOs/DSOs), accounting for 65% of the market in 2023. However, smaller "behind-the-meter" battery storage systems (from the network operator's perspective) have also captured a significant 35% share of the market.

System-level storage can provide peak capacity, particularly influenced by the growing role of photovoltaic (PV) generation in energy systems. These systems can be charged during off-peak hours when energy demand is low or when solar power production peaks during the day. They can then discharge energy in the evening when demand is high, and PV systems are no longer generating electricity.

By utilizing excess solar energy generated during the day to charge behind-the-meter batteries, consumers can increase their self-consumption of electricity produced by rooftop PV installations. Additionally, by charging batteries when electricity prices are at their lowest, behind-the-meter storage will soon allow Polish consumers to actively participate in dynamic electricity pricing, helping to lower their electricity bills.

According to the IEA, in order to facilitate the rapid expansion of solar and wind energy in line with global emission reduction targets, global energy storage capacity must increase sixfold—to 1,500 GW—by 2030. This forecast includes both grid-scale storage (TSO/DSO) and behind-the-meter solutions.

PHOTOVOLTAIC FARM LOCATIONS

LOCATIONS WITH GRID CONNECTION CONDITIONS ACHIEVED:

- 1 DL Invest Park Rzeszów – 2.3MWp
- 2 DL Invest Park Dębica – 0.6MWp
- 3 DL Invest Park Teresin I – 2.559MWp
- 4 DL Invest Park Teresin II – 2.669MWp
- 5 DL Invest Park Bielsko Biała III – 10MWp

LARGE SCALE BATTERY ENERGY STORAGE SYSTEM (BESS) LOCATIONS

BESS LOCATIONS PLANNED:

- 1 DL Invest Park Mierzęcice – 25MW
- 2 DL Invest Park Siewierz – 25MW
- 3 DL Invest Park Bielsko Biała III – 25MW
- 4 DL Invest Park Teresin – 5MW

PRODUCTION POTENTIAL OF INSTALLATIONS ON LOGISTICS PROPERTIES

AUDITED LOGISTICS WAREHOUSES:

- 1 DL Invest Park Psary – 6.1MWp
- 2 DL Invest Park Bielsko Biała – 0.8MWp
- 3 DL Invest Park Sędziszów Małopolski – 0.75MWp
- 4 DL Invest Park Elbląg – 0.39MWp
- 5 DL Invest Park Legnica – 0.35MWp
- 6 DL Invest Park Kluczbork – 0.35MWp
- 7 DL Invest Park Rydułtowy – 0.28MWp

DATA CENTER LOCATION

SELECTED LOCATIONS FOR DATA CENTER DEVELOPMENT:

- 1 DL Invest Park Psary – 100MW
- 2 DL Invest Park Bielsko-Biała – 82MW
- 3 DL Invest Park Mierzęcice – 100MW
- 4 DL Invest Park Siewierz – 100MW
- 5 DL Invest Park Teresin – 50MW

Lease Back

DL Invest Group

Sale and Leaseback - involves not only building and delivering a warehouse or production facility tailored to the client's needs, ensuring the possibility of expansion, reconstruction, or extension of such a facility with a buyback option after a 10-15 year lease term, but most importantly, we can offer more favorable conditions than standard financial loans, providing the possibility of releasing capital by purchasing the property and leasing it back on a long-term 10-15 year lease with a buyback option. This not only allows the release of 100% of the property's capital value, often also repaying liabilities, including loans secured against the property, thus reducing the company's debt and freeing up cash, improving the company's standing and liquidity, but above all, it is an opportunity to acquire additional capital for business growth.

Our model is based on two interconnected transactions carried out simultaneously:

The sale of the property at market price by the current owner to DL Invest Group, resulting in the seller obtaining additional capital and improving their current financial performance.

- The simultaneous signing of a long-term lease agreement, enabling the previous owner to fully use the property, with the possibility of delegating management to DL Invest Group to optimize property maintenance costs, and with the full

ability to modify and expand the building to meet the tenant's changing needs, at the full risk and cost of DL Invest Group.

The direct benefit for the seller is that by selling the property, additional funds are obtained and leased for investments and growth in the seller's business activities, improving liquidity, or reducing external debt, and achieving better financial results.

- As a result of the sale, full use of the property is retained under a long-term lease agreement for, e.g., 20 years, with the option to extend it for subsequent 20-year periods.
- DL Invest Group will remain the landlord throughout the lease period. DL Invest Group's goal is to continuously expand its portfolio of commercial properties, retain them long-term in the Group's portfolio, and actively manage them.
- Thanks to its own management structure, including having its own general contractor with a design office, DL INVEST GROUP can achieve significant optimizations not only in asset management but also in adapting the property to changing requirements.
- Throughout the use of the facility, there is the possibility of reconstruction or adaptation to the user's needs, at the expense and risk of DL Invest Group, improving the quality and efficiency of the used

- property.
- Professional administrative and technical property management services are provided by the DL Invest Group's Property Management Department, consisting of specialists with appropriate professional qualifications, licenses, and experience.

Lease Back

LEASE BACK

The DL Invest Group leaseback offer is addressed to owners of commercial properties that are used for their own needs, such as warehouses or office buildings, and to companies that are looking for opportunities to obtain additional capital for business development through the effective use of their properties, while fully using and controlling a given property.

With all this, the most important value is entering into cooperation with DL Invest Group, which is not only a developer who has the general contracting in one hand (design department and asset management department), but in particular is a long-term owner and investor who has the interest of developing its clients, actively supporting them, among other things, by providing modern office, warehouse and production infrastructure at its own expense, while adapting the facilities to the client's needs in order to

CONFIRMING THE COMPETENCE OF THE GENERAL CONTRACTOR

DL Invest Group has been working for many years with customers from the FMCG sector, including the leading Polish grocery operator Stokrotka. In 2019, a distribution center was put into operation on the premises of DL Invest Park Psary - a facility of frozen and cold storage, which is currently undergoing expansion.

It is the flexibility and competence in the implementation of this type of facilities, resulted in another victory in the tender for the

Hutchinson is a global format group, a leader in the automotive, industrial, aerospace and consumer products industries. It is the chemical branch of the Total Group, one of the world leaders in elastomer processing. The Group is present in Europe, North and South America and the Far East, employing 25,764 specialists in 119 factories in 25 countries.

In Poland Hutchinson is present in Żywiec, Bielsko-Biała and Łódź where it produces mainly for the automotive industry.

FM Logistic is one of the international leaders in various fields of supply chain management. As an independent group, it is recognized as an expert in the consumer goods, retail, perfume and cosmetics, industrial and health markets.

FM Logistic is headquartered in 14 countries and generated revenue of €18.778 billion in IQ 2018.

This is confirmed by many completed and current projects for leading companies in the Polish and global market such as: Hutchinson Polska, DHL, FM Logistic, Stokrotka, STILL, GEFCO, InPost, BGK, ista Polska, Securitas Polska, Rossmann, Pepco.

ista Shared Services Polska (iss) is a modern outsourcing center which operates in three core competence areas and provides billing services for individual heat, water and other utilities for customers in Poland and worldwide. It offers accounting services for the internal companies of the ista Group and IT services for the development and administration of internal IT systems.

iSS chose DL Invest Group's latest project DL Prime as its location in Gliwice and signed a contract for a target leasing area of almost 7,800 m².

Bank Gospodarstwa Krajowego is a Polish state-owned bank, the only such entity in Poland owned by the State Treasury. It was established by an act of law to support government social and economic programs and to develop local government and regional development programs.

Bank Gospodarstwa Krajowego chose as its location the DL Piano office building in Katowice.

Rossmann Supermarkety Drogerijne Polska is one of the largest drugstore chains in Europe, with which DL Invest Group has cooperated for about 10 years. Rossmann is an example of a demanding Tenant, both in terms of benefits arising from the location of the property, the quality of service and the standard.

Long-term cooperation between the parties is a result of DL Invest Group's flexibility, professionalism and responsible approach to business.
